

MATTED DOG RELEASE FORM

Matted coats can cause a variety of skin and health problems. Matted fur does not allow for air circulation to the skin causing hot spots, bacterial and fungal infections. Fleas, ticks, maggots, and other parasites may be lurking in the coat causing further skin infections. Matted fur also pulls and binds, causing pain to your pet when they move or lay on mats. The skin underneath is usually raw and inflamed. Matted coats will not dry properly and can lead to rotting fur and skin.

Due to the matting, your dog's hair may need to be shaved extremely short to the skin and may show signs of skin irritation and sores due to the matting, wet undercoat, and dirty undercoat. In order to take care of a dog that is matted, the required grooming session may be stressful.

It is the goal of our salon and our groomers to make your pet's grooming experience as stress free as possible.

Due to the condition of your dog's coat, we have determined the only humane way to do this is to shave the dog's coat down. This is a short clip, removing all the matting. Where feasible, we work to de-mat/brush out the dog's coat, but only when it would not cause excessive pain and suffering to attempt to do so.

There is a strong chance that your pet's skin will become irritated during the clipping process. We will use a medicated shampoo to help sooth any irritation that may occur. The matted hair rests tightly against the skin and the only way to remove it is to use a short blade clip between the skin and mats. Our groomers are very careful but the possibility of injury exists. Understanding these risks, our salon is authorized to proceed with the de-matting process.

I hereby release Fur Tamer, Inc. from any liability associated with the above-mentioned process and any and all medical problems that may be uncovered and/or occur during the stripping and de-matting process.

Should my pet need veterinarian care after or during this process, I agree to pay any and all veterinarian fees.
